

2x2x2 Base Assembly Instructions

1. Slightly fold all horizontal and vertical scored lines on the box – this makes it easier to pop up the box.

2. Fold up the two long sides, then push in the two diagonal perforated sections (at the corners) inward and bring up the front side of the base (the side that is nearest to you).

3. Fold the top part of the front side of the base down inside to the bottom of the base until the two side tabs snap into place.

4. Repeat steps 2 and 3 for the other side of the base.

5. The base is now assembled.

6. Put the lid on the base and the 2x2x2 box is ready to be filled and/or decorated.
